# LEARN SPARK RECOMMENDED STUDY TOOLS

## BRACE MAP

### Starting Point

Choose your topic or situation and place it as a heading at the biggest brace (on the left-hand side of the page as you are looking at it).

**TOP TIP:** Brace Maps are better for specific topics/situations/themes/objects etc., rather than general concepts or ideas.

Use the spaces within smaller braces to jot in subheadings and other details related to your topic/situation etc. Break up the information and think about the **relationships/connections** between the different parts.

### PURPOSE

This method can be used by students to ensure they are analysing the different parts of a topic or situation. It can help break up what students are studying and make the information less overwhelming.

### QUICK TIP

Use this tool to explore the relationships/connections between the parts of the topic/situation.
