

T-CHART DIAGRAM

Topic: _____ Date: _____

LEARN SPARK RECOMMENDED STUDY TOOLS

T-CHART DIAGRAM

Starting Point

Choose your topic and think about the **differences** between the two things you are contrasting. These could be two **themes** or **processes** or **characters**.

Top Tip: You may wish to use this study tool to **test your recall** of information. After reviewing and closing your notes, in the columns jot down how much information you can remember about what you are contrasting.

In the columns, **summarise** or **paraphrase** what you have read, focusing on **differences**.

In the columns, you may wish to use **bullet points**, **diagrams**, **images** or **paragraphs**.

Some examples of what you could use the T-Chart to compare:

English Literature – poem structures/language used Comparative Coursework for novels

Politics – comparing political systems/ideologies

History – comparing sources/different causes of an event

Maths – comparing different problem solutions/equations

Science – comparing different hypotheses/experiments

PURPOSE

This method can be used by students to contrast two different parts of topics. A T-Chart has a large heading at the top with the title and two columns side by side that are filled in with information according to each topic. It visually resembles the letter T. It can be used as a method for being selective, as well as organising and prioritising information.

QUICK TIP

The information in the columns can be organised as a list with text or with images to support visually.
